4. (Amended) [Set of sheets for the manufacture of books, which set is manufactured in accordance with the preceding claims, characterised in that it comprises] A set of sheets for the manufacture of books manufactured in accordance with the process set forth in claims 1-3, characterised in that said set of sheets comprises a sheet on which the text is distributed in bodies of text which correspond respectively to pages of a book and which are arranged symmetrically with respect to the central axis of symmetry of the sheet and with respect to one or two of the axes of symmetry which pass through said centres of symmetry and which are parallel with the outer edges of the sheet, the sheet being folded about one or both axes of symmetry, respectively, if two symmetrical bodies of text are printed on each face of the sheet, or being folded about both axes if there are four bodies of text for respective pages on each face of the sheet.
